

MODEL D-2 OIL DRAIN

Consists of bed plate, Tru-Loc band and adjustable funnel. Funnel is 11" in diameter and can be adjusted to any desired height up to 25" from top of drum. Ingenious friction lock with finger tip release automatically locks the funnel in any position. Screen guard prevents crankcase plug, or gear box plug from dropping into drum. This unit, when used on refiner's original containers having a diameter of 14 $\frac{1}{8}$ ", is highly efficient but low in cost. Can be used on BENNETT Model 2 Truck (upper left) or on BENNETT SCOOTER (upper right). Specify if drum is desired. (Extra charge.)

NOTE: If Model 2 Truck is desired, specify Model D-2 Oil Drain with Model 2 Truck; if the Bennett Scooter is desired specify Model D-2 Oil Drain with Bennett Scooter.

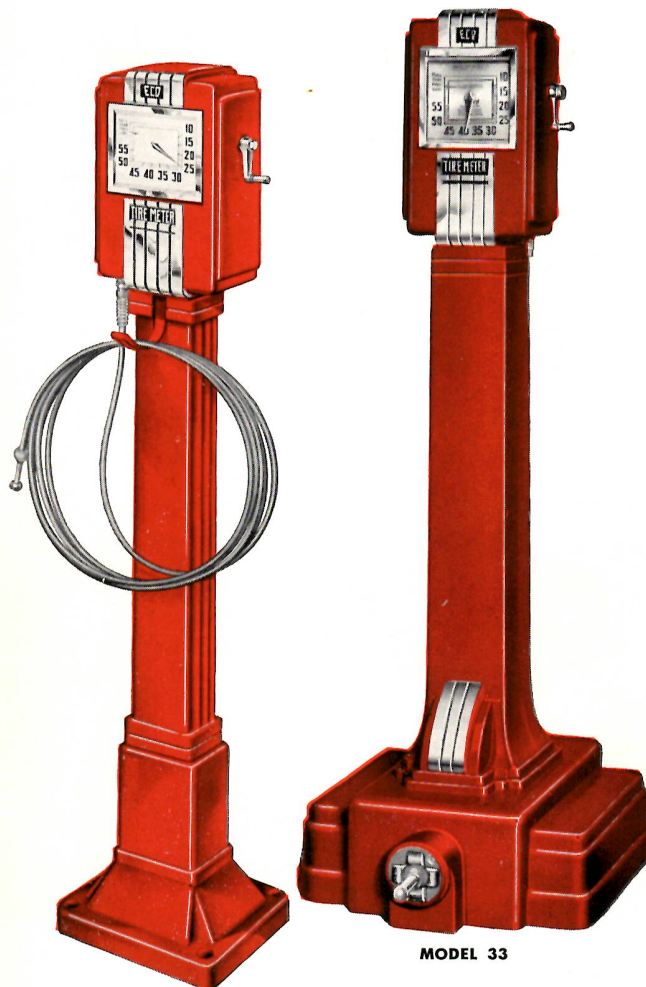

MODEL D-3 OIL DRAIN

Consists of a sturdy 11" diameter funnel adjustable to any height up to 25" from top of drum. Ingenious friction lock with finger tip release automatically secures funnel at desired height. Drain pipe, with guide-adaptor easily fitted to all 33 or 55-gallon drums having a 1 $\frac{1}{2}$ " or 2" threaded bung opening.

By using this unit on a refiner's original standard container and a BENNETT Model 3 Truck, a heavy duty and serviceable oil drain—as illustrated—may be had at very little cost.

NOTE: If Model 3 Truck is desired, specify Model D-3 Oil Drain with Model 3 Truck.

MODEL 38

MODEL 38 Harmonious and modernistic in design . . . chromium trim. Features include double-bell, high-speed automatic mechanism; airplane dial illumination; built-in air cleaner. "Hose-hook" shut-off valve relieves pressure in hose. An efficient unit at a moderate price. Shipping weight approx. 117 lbs.

MODEL 33 The last word in accurate, convenient tire service. High-speed automatic mechanism, two-tone double action bells, attractive chromium trim, airplane dial illumination. Mechanism calibrated 10-55 pounds with straight air release. Enclosed reel retracts hose and automatically cuts off air pressure. Recoil speed of hose controlled by governor. Plus features include air cleaner and factory oil-sealed thrust bearings. Locking arrangement prevents theft of hose. An efficient unit that enhances the appearance of any service station. Shipping weight approx. 248 lbs.
