

KEROSENE PUMPS

BIG BERTHA

MODEL 1305S

One gallon pump for rapidly converting oil "highboys" into efficient kerosene units. Furnished with one and two quart stops. Pump made with two different type bases: (1) Bennett base for Bennett Highboys, (2) Universal base for use on any and all make outfits. (When ordering specify type of base required.) Shipping weight approx. 51 lbs.

MODEL 1305 Same as 1305S without the one and two-quart measuring stops. Specify base required.

MODEL 1305G One-gallon conversion pump like Model 1305 but equipped with 8' gasoline hose and nozzle and without one and two-quart measuring stops. Shipping weight with Universal Base approx. 60 lbs. Shipping weight with Bennett Base approx. 54 lbs.

MODEL 1305GS One-gallon pump identical to 1305G. Equipped with one and two-quart measuring stops. Specify base required.

MODEL 1307S

One gallon pump with sliding intake pipe for use with 15 to 60-gallon drums. Base is threaded to fit 1½" and 2" drum openings. Pump equipped with built-in foot valve and one and two-quart measuring stops. Shipping weight approx. 47 lbs.

MODEL 1307 Same as 1307S without one and two-quart stops. Shipping weight approx. 46 lbs.

TOTALIZING OUTBOARD METERS

Outboard meters registering to 100,000 quarts are easily adapted to all Big Bertha pumps. When order specifies installations will be made at the factory at small extra cost. The BENNETT outboard meter has no packing glands, therefore, cannot cause leakage. Sealing wire prevents tampering with meter.
