

MODEL 505

One-quart barrel pump with adjustable intake for use with 15 to 60-gallon drums. Return drain pan and cover attached. Base threaded to fit 1 1/2" and 2" drum openings. Non-drip nozzle with bottle filling nipple. Provision for locking. Shipping weight approx. 22 lbs.

MODEL 506

One-quart barrel pump with adjustable intake for use with 15 to 60-gallon drums. Automatic self-closing return arm drain. Bottle filling nipple. Base threaded to fit 1 1/2" and 2" drum openings. Provision for locking. Shipping weight approx. 24 lbs.

TOTALIZING METERS

If specified on order, totalizing meter will be attached on above models at small extra cost.

MODEL 200

Universal barrel pump. Rigid spout. A precision-built, all-metal pump. Rapid action. Pumps approximately one pint per stroke. Threaded to fit 1 1/2" and 2" drum openings. Sliding intake to drain 15 to 60-gallon drums. Shipping weight approx. 10 1/2 lbs.

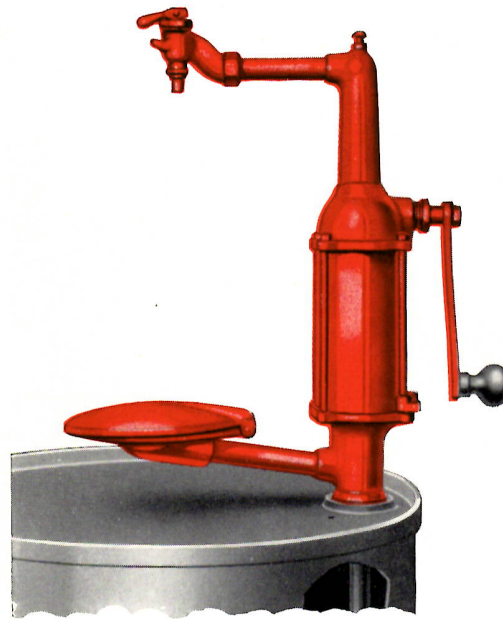

MODEL 202

Universal barrel pump identical to Model 200, but equipped with flexible nozzle. Shipping weight approx. 10 1/2 lbs.

MODEL 200-19

Same as Model 200 but equipped with the Imperial type manually operated positive shut-off nozzle. Shipping weight approx. 11 lbs.

MODEL 505A

One-quart barrel pump with intake and fittings for alcohol drums having 3/4", 1 1/2" and 2" bungs. Return drain pan has hinged cover. Shut-off nozzle. Shipping weight approx. 23 lbs.

MODEL 200A

Standard lever action barrel pump measuring approximately one pint per stroke. Fitted for use with alcohol drums having 3/4", 1 1/2" and 2" bungs. Rigid spout for general use. Shipping weight approx. 11 lbs.

MODEL 200-19A

Lever action unit the same as Model 200A but equipped with Imperial type manually operated positive shut-off nozzle instead of rigid spout. Shipping weight approx. 11 lbs.

MODEL 202A

Lever action barrel pump identical to Model 200A but equipped with flexible hose instead of rigid spout. Shipping weight approx. 11 lbs.
